

Press Release 7th General Meeting ISRA (4 March 2013, Dubai)

ISRA PREPARES FOR EU LIST

At its 7th General Meeting in Dubai ISRA members underlined the importance of meeting European Union Ship Recycling requirements. The new EU Regulation aims to mandatory enforce EU flagged ships to only use environmentally sound recycling yards. ISRA will prepare in time its members to be listed as approved yards.

ISRA Chairman Turkish recycler Adem Simsek states: “ Our customers more and more require certified yards. Therefore we will push our members to update their facilities in line with European requirements. Not only infrastructure but also management systems will be high on the agenda.”

With its ten members, ISRA offers more than sufficient capacity to dismantle the annual number of EU ships phased out, in an environmentally sound and safe manner.
